

Trusted. Secure. Reliable Password Management for Law Firms

#1 80 of the top 100 law firms have been "hacked" since 2011 and over 35% of all law firms have had a security breach!

Security and privacy go hand in hand. LastPass is designed to keep sensitive data safe using a zero-knowledge security model ensuring sensitive data doesn't leave your device. Plus, we never know your master password!

#2 You are the gate-keepers of over 70% of all non-public IP

Password management reduces the risk of cyber-attacks while safeguarding your client's sensitive and private information.

#3 Increase your firm's cyber-hygiene

Get complete control with complex passwords, multi-factor authentication and best-in-class cryptology.

#4 Phishing—the number one threat to your law firm's compliance and security-posture!

More data breaches are caused by phishing than any other means. LastPass will protect you from auto filling in passwords to untrusted and or non-vetted links and sites.

#5 Mitigate risk and build trust with clients

LastPass makes it easy to keep you and your client's critical information safe, secure, and easily accessible everywhere you work.

See how simple security can be
with LastPass.
